

CLUMPING BENTONITE

COMPOSED OF MICROBENTONITE

NEUTRAL

LAVENDER

FAST ABSORPTION, ONLY THE AGGLOMERATED BLOCKS ARE REMOVED

SUBSTRATE FOR CAT LITTLE TRAY

EASY TO CLEAN

100% NATURAL AND HYPOALLERGENIC

HIGH ODOR CONTROL

HIGH BINDING POWER

- Its binding capacity **encapsulates waste**, preventing dirt and odor from spreading in the environment.
- Of **natural and hypoallergenic origin**, quickly absorbed.
- **Easy to clean** since only the agglomerated blocks must be removed.
- **Greater durability**, since waste is not spread throughout the tray.
- Environmentally friendly and medium tracking.

PRESENTATIONS:

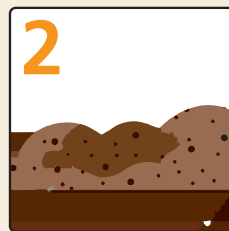

- 26,4LBS bag (lasts 3 months) and 8,8LBS (lasts 1 month)

MODE OF USE

In a litter tray suitable for your cat, place the product (approximately 2,36 inch high), and arrange it evenly. Shake well.

Urine and feces are quickly absorbed, thus forming clumps that isolate moisture, preventing it from reaching the bottom of the tray.

With the help of a sanitary shovel, remove any agglutinated clumps from the tray. It is recommended to do it once a day.

Replace the missing granules in the tray. This way you will keep a large amount of product always clean, which will facilitate the monthly duration of the granules.
